

Download Sample Projects

Notice: These projects are for training and reference purposes only. They are not intended to be used as actual projects for sale.

How to Install These Files

1. Click on the name of the project below to download a zip file containing the project files
2. Hit **'Save'** at the prompt to save the .zip file to your hard drive*
3. Extract all files in the .zip file to a unique temporary folder* on your hard drive

* Do not store these files within your SI5 Projects folder hierarchy as this may cause instability

4. Go to Navigator > Projects > Import Project and browse to the .dtl file in the temporary folder
5. Click Open to Import the Project
6. If you have a problem downloading and using these files, this may be a known Internet Explorer issue with a workaround. See <http://support.microsoft.com/kb/308090> for more information
