

System Integrator 5 – Service Pack 2 – What's Included

Attention LANSync users

Service Pack 2 is a client (desktop) update only. If you are using LANSync you should make sure that you have Service Pack 1 installed on your LANSync server. You can run the 'Check for Server Updates' from the Start->D-Tools menu on your LANSync server machine to check for any server updates.

Service Pack 2 includes all updates in [Service Pack 1](#) plus:

New Features

- Proposals with Graphics
- Proposals with Installed Price

Enhancements

Reports

- Improvements to proposals to allow aggregation of items
- Allow hiding of line item prices on proposals
- Allow price of labor items to be hidden on proposals
- Allow more flexible grouping of proposals
- New cover page for proposals
- Updated proposal summary to hide fields with zero value
- Improved page break behavior on proposals and other reports
- Proposal now shows client description for line items (when available)

Bugs Fixed

Business Manager

- Fixed Sales Order/Work Order bug relating to SOID and WOID values

MMPD

- Fixed resizing bug in MMPD on high resolution monitors

Reports

- Fixed names under signature lines in contract report
